Weckesser's newest

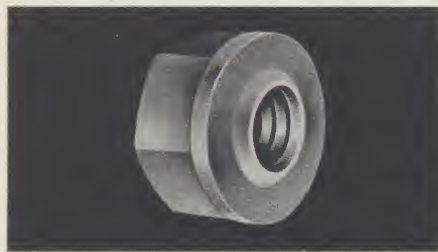

Our line of plastic fasteners and holding devices keeps growing!

plastic pipe clamps

These extremely versatile clamps are specifically designed for use in plumbing, heating, marine, electrical and refrigeration applications.

They are available in natural nylon or brown plastic, in nine stock sizes, ranging from 1/4" to 1 1/8" (pipe O.D.).

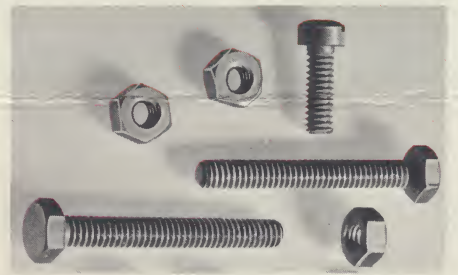

nylon lock nuts

These one-piece washer-faced hexagonal nuts are self-tapping, self-locking and self-sealing. No washers or insulating bushings are required and they may be used with both metallic and nylon screws. They adjust automatically to the threading of any screw.

A cone, molded in the base of the nut, provides a positive seal against liquids and gases. Replaces the conventional nut and washer combination in many applications.

Available in nine sizes, ranging from 2-56 to 1/4-28.

These fine items supplement our comprehensive variety!

PVC nuts, bolts and washers

This new group of plastic nuts, bolts, and washers, made of polyvinyl chloride, is inert to attack by strong acids, alkalies, salt solutions, alcohols, and many other chemicals. They have excellent dielectric properties, good tensile and flexural strength, and offer long service life with good aging characteristics. Bolts are stocked in 7 lengths, in 1/4-20 and 5/16-18 thread sizes, with hex and fillister heads. Matching nuts and washers in stock. 3/8-16 and 1/2-13 sizes available on request.
